## Vibration measurement system for evaluating comfort in passenger and merchant ships

ISO 6954:2000 provides the framework for measuring and recording vibrations that occur in the crew and passenger accommodation sections of ships, to evaluate suitability and comfort.

The present measurement system for marine vibrations consists of the Accelerometer (tri-axial) PV-83CW (for floor positioning), the 3-Axis Vibration Meter VM-54, and the Marine Vibration Card VX-54WS. The system allows measurement and evaluation compliant to the relevant standards.

**VM-54**

### ISO 6954:2000

**Mechanical vibrations - Guidelines for the measurement, reporting and evaluation of vibration with regard to habitability on passenger and merchant ships**

- Accelerometer PV-83CW (tri-axial) (for floor positioning) is supplied as standard accessory of VX-54WS.
- Accelerometer PV-57A (for wall positioning) available as optional accessory.
- Storing of measurement data on CompactFlash™ memory card.
- Tri-axial analogue AC outputs for connection to frequency analyzer, data recorder, or other waveform recording device.
- Excel macro for creating reports is supplied accessory.
- Soft protection case with shoulder strap is supplied accessory for VX-54WS. This facilitates measurement in the marine environment and protects the unit from water and oil.

## Specifications

Applicable standards : ISO 6954: 2000

Input : Accelerometer (tri-axial) PV-83CW,  
or Accelerometer PV-57A (option)

Measurement frequency range : 1 to 80 Hz (Up to 1 kHz with flat characteristics,  
when using PV-57A)

Frequency weighting : Wm (ISO 2631-2: 2003), bandwidth limiting

Measurement modes : Acceleration, velocity

Measurement range :

[With PV-83CW] Acceleration (mm/s²):  
30, 100, 300, 1000, 3 000, 10 000  
Velocity (mm/s): 1, 3, 10, 30, 100, 300

[With PV-57A] Acceleration (m/s²): 0.3, 1, 3, 10, 30, 100, 300, 1000  
Velocity (mm/s): 10, 30, 100, 300, 1000, 3 000

Processing functions : RMS, max (MTVV), min

Measurement time settings : 10 sec, 1 min, 2 min, 10 min

Whole Body Vibration Card

**VX-54WB1**

## Evaluate Vibrations Affecting the Whole Body

Vibrations arising in vehicles are transmitted to the human body via the feet, posterior, and via the back when leaning against a backrest.

Methods for evaluating the effect of such vibrations are specified in the ISO 2631 series, which are concerned with vibration perception, comfort levels, and health damage.

The standards aim at quantifying periodic as well as irregular and transient whole-body vibrations.

Special frequency weighting characteristics are given for various vibration transmission routes and for the three axes.

The whole-body vibration measurement system consists of the Seat Measurement Accelerometer PV-62 (tri-axial), 3-Axis Vibration Meter VM-54, and Whole Body Vibration Card VX-54WB1.

The system allows measurement and evaluation compliant to the relevant standards.

### Running R.M.S acceleration value

$$a_w(t_0) = \left[ \frac{1}{\tau} \int_{t_0-\tau}^{t_0} a_w^2(t) dt \right]^{\frac{1}{2}}$$

Where  
 $a_w(t)$  : Instantaneous value of vibration acceleration to which frequency weighting was applied  
 $t$  : Moving average integral time (s)  
 $\tau$  : Time (integral variable)  
 $t_0$  : Observation time point (instantaneous time)

### Maximum Transient Vibration Value (MTVV)

$$MTVV = \max[a_w(t_0)]$$

### Vibration Dose Value (VDV)

$$VDV = \left[ \int_0^T a_w^4(t) dt \right]^{\frac{1}{4}}$$

Where  
 $a_w(t)$  : Instantaneous value of translational or rotary vibration acceleration to which frequency weighting was applied  
 $T$  : Continuous measurement time (s)

### Basicentric axes of the human body (Seated position)

### Frequency weighting curves for principal weightings

### Guide for application of frequency-weighting curves for principal weightings

Frequency weighting	Wk	Wa
Health	z-axis, Seat-surface	x,y-axis, Seat-surface
Comfort	z-axis, Seat-surface z-axis, Standing vertical recumbent (expect head) x,y,z-axis, Feet	x,y-axis, Seat-surface x,y-axis, Standing horizontal recumbent y,z-axis, Seat-back
Perception	z-axis, Seat-surface z-axis, Standing vertical recumbent (expect head)	x,y-axis, Seat-surface x,y-axis, Standing horizontal recumbent

## Specifications

**Applicable standards** : ISO 2631-1: 1997, ISO 2631-2: 2003, ISO 8041: 2005.

Hand-Arm Vibration Card

**VX-54WH**

## Evaluate Vibrations Transmitted Through Hands and Arms

Vibrations arising in hand-held tools are transmitted to the hands, arms and shoulders of the operator. Methods for evaluating such vibrations are covered by ISO 5349-1 and ISO 5349-2. These standards not only specify frequency weighting characteristics and evaluation factors, they also contain detailed information about how to mount accelerometers.

The hand-arm vibration measurement system consists of the Accelerometer PV-97C (tri-axial), 3-Axis Vibration Meter VM-54, and Hand-Arm Vibration Card VX-54WH. The system allows measurement and evaluation compliant to the relevant standards.

## 3-Axis Vibration Meter

# VM-54

The 3-Axis Vibration Meter VM-54 can be used with PV-83CW and various other accelerometers.

- 3-axis output signal for connection to frequency analyzer, data recorder, or other waveform recording device.
- Microphone extension cable (EC-04 series) can be used to extend accelerometer connection.

**Inputs:** 3-channel input (using 3-Channel Input adapter VP-80)

**Measurement frequency range:** 0.5 to 5 000 Hz

**Measurement mode:** Acceleration rms value, Instantaneous value and maximum hold

**Measurement range:** With piezoelectric accelerometer

Sensitivity setting	0.1 to 0.999	3, 10, 30, 100, 300, 1 000, 3 000, 10 000
	1.00 to 9.99	0.3, 1, 3, 10, 30, 100, 300, 1 000
	10 to 99.9	0.03, 0.1, 0.3, 1, 3, 10, 30, 100

With PV-83CW

Acceleration	0.03, 0.1, 0.3, 1, 3, 10
--------------	--------------------------

With PV-57A

Acceleration(m/s <sup>2</sup> )	0.3, 1, 3, 10, 30, 100, 300, 1 000
---------------------------------	------------------------------------

## FFT Analysis card

# VX-54FT

Option

The VX-54FT functions as a memory card and allows storing FFT analysis result data in CSV format. The supplied Excel macro makes it easy to generate a graph display from the stored data.

- Display items** : 1. FFT processed spectrum display  
2. Effective value (O.A.) calculated from time domain  
3. O.A. value\* calculated from frequency domain (FFT result)  
\*Partial overall value for specified frequency range can also be calculated.

**Display functions:** Dependent on respective program card

**Measurement channels** : X, Y, Z (3 channel simultaneous analysis)

**Frequency range settings** : 50 Hz, 100 Hz, 200 Hz, 500 Hz, 1 kHz

Frequency span	Sampling frequency	Sampling interval	Frame time	Frequency resolution
50 Hz	128 Hz	7.8125 ms	8 s	0.125 Hz
100 Hz	256 Hz	3.90625 ms	4 s	0.25 Hz
200 Hz	512 Hz	1.953125 ms	2 s	0.5 Hz
500 Hz	1.28 kHz	0.78125 ms	0.8 s	1.25 Hz
1kHz	2.56 kHz	0.390625 ms	0.4 s	2.5 Hz

## Options

Product name	Model
FFT Analysis Card	VX-54FT
3-ch Preamplifier	VP-80
Accelerometer (tri-axial)*1	PV-83CW
Accelerometer	PV-57A
Carl Cable (for PV-57A)	PV-51K

Product name	Model
Magnet Attachment (for PV-57A)	VP-53S
Seat Measurement Accelerometer (tri-axial)	PV-62
Accelerometer (tri-axial)	PV-97C
Accelerometer (single axis)	PV-90B

Product name	Model
Accelerometer (single axis)	PV-91C
Connection Cable*1	EC-54
Extension Cable (2 m )	EC-04
AC Adapter (100 to 240 V AC)	NC-98series

\*1 Supplied only with VX-54WS

## System Configuration (Accelerometer input / 3-axis Output)

OP = Option

- Display** : LCD x 2 (main and sub)  
**Output connectors** : Connectors for 3-axis signals (AC)  
**Power supply** : Four IEC R14 (size "C") batteries, 16 hours continuous operation with alkaline batteries  
**Ambient conditions** : -10 to +50 °C, max. 90 % RH  
**Dimensions and weight** : 56 (H) x 200 (W) x 175 (D) mm; approx. 1 kg (including batteries)

- Window types** : Hanning, Rectangular  
**Analysis lines** : 400  
**Processing** : Instantaneous value, RMS method, maximum value  
**Display (VM-54)** : Main display : Shows instantaneous value in specified channel (rms with 1 second integration time)  
Sub display : Shows FFT analysis result in specified channel and overall value simultaneously  
X axis : Frequency (Hz)  
Y axis : Linear  
Menu screen  
Recall screen  
Zoom ratio [X axis] : x1, x2, x4  
[Y axis] : x1, x4, x16, x64, x256  
**Frequency weighting characteristics** : Dependent on respective program card  
**Processing frames** : max. 999 (selectable in 1-frame steps)  
**Overlap** : 50 % (no overlap at 1 kHz)  
**Level range** : Dependent on respective program card  
**Data store function** : Manual store on VX-54FT card  
3-channel FFT spectrum data stored in CSV format  
Max. 100 data sets per file (3-channel data form 1 set)  
Max. 50 files  
**Recall function** : Data stored on VX-54FT card can be recalled on sub display  
**Resume function** : Available  
**Interface** : For dedicated printer only (hard copy of sub display contents can be produced on dedicated printer)  
**Outputs** : AC output according to selected frequency weighting characteristics (O.A.)  
**Battery life (using VX-54FT)** : 16 hours continuous operation (using PV-83CW, at room temperature, with alkaline batteries)  
**Ambient conditions** : -10 to +50 °C, max. 90 % RH

**JCSS**  
JCSS 0197
